

Concierge Communications Adds C7 Data Centers to Provider Portfolio

Tempe, AZ, October 22, 2009 – Concierge Communications, a national broker of business technology and communications solutions, announced the addition of C7 Data Centers to their extensive list of providers. C7 Data Centers (C7) is a leading provider of collocation, disaster recovery, and virtualized business solutions.

“Concierge Communications is excited to expand our portfolio into the online backup, virtual server and data center collocation areas,” said Clark Atwood, Vice President of Concierge Communications. “These solutions compliment our other portfolio offerings and will provide our clients and agents cloud-based options that clients are seeking.”

Concierge Communications believes their current client base will appreciate the addition of C7 to their data center options not only because of the company’s disaster-safe locations throughout Utah, but also because of the data center design, technology architecture, and low power costs.

“C7 believes in a strong sales channel and working with excellent partners with proven selling models. This new agreement with Concierge will build the C7 name and will bring more customers to our secure facilities,” stated Nate Hatch, CEO C7 Data Centers, Inc. “Concierge has been successful in selling advanced technology solutions nationally and we can't think of a more mutually beneficial partnership.”
